

Yashi Srivastava

Backend Developer | Python, Cloud & Applied AI

+91 88406 57829 yashisrivastava2510@gmail.com  GitHub  LinkedIn  Portfolio  LeetCode

Professional Summary

Backend Software Engineer experienced in building scalable REST APIs and Agentic AI workflows using Python, FastAPI, and LangGraph. Strong background in relational/vector database design, query optimization, and containerized deployments across AWS and Kubernetes.

Education

The LNM Institute of Information Technology
B.Tech in Communication & Computer Engineering

Jaipur, Rajasthan
2023 – 2027

Technical Skills

Languages	Python (Async/OOP), SQL, C++, Java, JavaScript, TypeScript
Backend & APIs	FastAPI, Node.js, Express.js, RESTful APIs, Microservices Architecture, JWT Auth
AI & Agentic Systems	Agentic AI Workflows, LangGraph, RAG Pipelines, Vector Search, PyTorch, Scikit-learn
Databases & Storage	PostgreSQL, MySQL, Qdrant, Supabase, Redis, Star-Schema Design, Query Optimization
Cloud & DevOps	AWS (EC2, S3), Docker, Kubernetes, CI/CD, GitHub Actions, Vercel, Render
Tools & Methodologies	Clean Architecture, Git, Linux, Tableau, Unit Testing, Agile/Scrum, KLEE, Z3

Experience

Data Science Intern

Trigyn Technologies Ltd. — DOITC, Government of Rajasthan

Jun – Aug 2026

Jaipur, Rajasthan

- Built automated data ingestion and validation pipelines in Python to process and normalize 100K+ monthly public service records.
- Architected a high-performance **star-schema relational model** in **MySQL**, optimizing analytical query execution times by 40% for executive reporting.
- Developed ETL workflows converting unstructured Excel datasets into structured relational tables, cutting manual preprocessing time by 35%.
- Collaborated in an **Agile/Scrum** cadence to deliver 5+ automated Tableau dashboards, ensuring data accuracy and automated metric tracking across departments.

Research Intern (Deep Learning)

MNNIT Allahabad (Supervisor: Dr. Joohi Chauhan)

Jun – Jul 2025

Prayagraj, India

- Engineered and benchmarked PyTorch neural network architectures across class-imbalanced healthcare datasets, achieving **86.5% accuracy** and **0.89 ROC-AUC**.
- Implemented training pipelines with weighted cross-entropy loss and cosine LR scheduling across SGD, Adam, and RMSProp optimizers.
- Optimized CNN inference pipelines over 60,000 images using data augmentation and batch normalization, reaching **74.2% test accuracy**.
- Explored **Federated Learning (FedAvg)** for privacy-preserving distributed model updates, analyzing communication and compute bottlenecks.

Projects

Enterprise Multi-Agent Knowledge Platform | *FastAPI, LangGraph, PostgreSQL, Qdrant, Docker, Kubernetes, AWS*

- Built an autonomous Agentic AI backend using **FastAPI** and **LangGraph**, orchestrating query routing between **Qdrant vector search** and an automated SQL retrieval agent.
- Implemented asynchronous request handling and modular provider adapters, enabling hot-swappable LLMs and embedding models without altering downstream API contracts.
- Secured endpoints using **JWT authentication** and bcrypt hashing while enforcing strict SQL parameterization and schema validations.
- Packaged backend services into **Docker containers** and configured **Kubernetes** deployment manifests with automated GitHub Actions CI/CD.

Responsive Developer Platform & Web Services | *React, TypeScript, Vite, Tailwind CSS, Resend API, Vercel*

- Developed a component-driven web platform with optimized routing, lazy loading, and dynamic chunk splitting for minimal client latency.
- Integrated transactional email microservices via **Resend API** with strict server-side schema validation and error-handling routines.
- Maintained an automated continuous deployment pipeline linking Git triggers directly to edge deployment servers.

Achievements & Leadership

- **Selected Participant, ACM-W India Grad Cohort 2025 (IIT Kanpur):** Selected among top nationwide undergraduate women in computing.
- **INSPIRE Scholarship, DST (Govt. of India):** Awarded for ranking in top 1% in Class XII board examinations.
- **Chairperson, ACM Student Chapter (LNMIIT):** Lead technical workshops, hackathons, and development tracks for 200+ members.
- **Stage 1 Qualifier, NTSE:** National Talent Search Examination.

Relevant Coursework

Data Structures & Algorithms, Database Management Systems (DBMS), Operating Systems, Computer Networks, Software Engineering, Object-Oriented Programming (OOP), Distributed Systems, Cloud Computing.
